A. New Zealand is an island country in the southwestern Pacific Ocean. In the 13th century the islands were settled by Polynesians who formed the Maori culture, which is considered to be the native culture of New Zealand. New Zealand was discovered in 1642 by a Dutch explorer. In 1840 the Maori and the British signed a peace treaty that declared British rule.

B. Sheep farming is one of the most important and well-known industries in New Zealand. There are 39 million sheep in the country, meaning that for every person in New Zealand there are 10 sheep. Sheep were first introduced to the country in the 1770s by James Cook.

C. New Zealand is in the Southern Hemisphere. So, the months of December, January and February are the summer months, while June, July and August are considered to be winter. This means that Christmas is a summer holiday. Some New Zealanders celebrate Christmas again in the middle of July. The school year begins in February and ends at the same time as the calendar year — at the end of December.

D. The national cuisine in New Zealand is controlled by the local ingredients as well as by the seasons. New Zealand is mainly an agricultural country, so most of the food comes from the sea and the land. A lot of the cuisine is influenced by British food, but also has elements of Mediterranean and Pacific Rim cuisine.

E. The combination of New Zealand's beautiful scenery and its small size has resulted in it becoming the set for many big-budget movies. Some of the most famous include "The Lord of the Rings", "The Hobbit", "Avatar" and "The Chronicles of Narnia". Because of the success and the popularity of these movies, countless people come to New Zealand just to see the place where their favorite movie was filmed.
